PROFILE

From the beginning of the school and college life I was so attentive in co-curricular activities like I did scouting. Not only that I was an inter-school cricket and football team captain. However, when it comes about university I was a little bit lost about the system and took time to cope up with the system. Here I got some football buddies who showed me the way of surviving at university. In the meantime I was not wealthy enough and already my CGPA was drastically fallen so I started to work for enriching skills and money.
